B1	Edit production quantities	PASS (or not tested)
BR1	Branch balance dashboard cards	PASS (or not tested)
G1	Sticky table headers	PASS (or not tested)
G2	Integer/decimal step inputs	PASS (or not tested)
SA1	Multi-branch assignment	PASS (or not tested)

Recommendations

- Print output verification requires manual inspection (window.print mock only)
- InstaPay payment method tested as recorded value — no external gateway integration
- Concurrent user testing limited to dual browser contexts, not load testing
- Mobile responsive tested at 768px viewport, not actual devices
- Visual regression baselines not established — recommend adding screenshot comparison
